

Attn Hiring Manager,

I had recently come across your posting for a position as a Senior Sales Engineer with Splunk. This position seems to be a perfect match for someone with my experience, education and career interests.

As you will notice from the enclosed resume, I have over 12 years of experience in software engineering. I am currently working as a Technical Lead at JP Morgan Chase, and have received a Master's Degree in Computer Science. I am qualified as a Sun Certified Java Programmer, and held positions ranging from a Systems Analyst to a Senior Software Engineer/Lead. I am proficient with various technologies such as Java, J2EE, Spring, and Web Services.

I feel that I would be a strong candidate for this position because I am very team oriented, and I am always eager to learn new technologies. If you feel that my qualifications and experience meet your criteria, I will be available for an interview at your convenience. I look forward to hearing from you. Thank you for your time and consideration.

Sincerely,

Rikin Asher
